

Our Services

Environmental Planning and Resource Consents

At PDP we provide specialist environmental planning services to help you navigate the environmental regulatory process.

Environmental planning services that we provide include:

- › Preparation of Assessment of Environmental Effects documents, resource consent application and project management.
- › Consent processing for district and regional councils
- › Public and iwi consultation
- › Submissions to planning documents, legislation and consent applications
- › Expert evidence at council and Environment Court hearings
- › Policy and Plan development, monitoring and review
- › State of the Environment reporting
- › Site selection and risk management
- › Negotiation of resource consent conditions with Council Staff
- › Technical assessments for environmental impacts on ground, water and air.

Typical PDP projects:

- › Preparation of AEE, presentation of evidence at consent hearing for 11,000 ha irrigation scheme, project management of consent requirements during the construction and operation of the irrigation scheme.
- › Consents for discharge from landfill; site investigation, consultation, statutory analysis, consent applications.
- › Preparation of resource consent and AEE for stormwater discharge from proposed laminated veneer timber mill. Presentation of expert evidence.
- › Community consultation and risk management, mediation and negotiation services to resolve conflict between industry and surrounding land owners.
- › Processing of consents for discharge of contaminants to land, coastal areas and groundwater from various applicants.
- › Detailed investigation of old landfill site and preparation of AEE for resource consent discharges to air and ground.
- › Secondment to Regional Councils to assist with processing of resource consent applications.

Contact us for more information on our environmental planning services or to discuss how we can help you with your project.
