

PATTLE DELAMORE PARTNERS LTD

Environmental Geologist / Engineering Geologist

Tauranga

- Varied and interesting role with excellent growth opportunities
- Many exciting projects coming up
- Great team and supportive, fun culture

This is an excellent opportunity to bring your enthusiasm, capabilities and potential to our thriving Tauranga office. The team is expanding rapidly as a result of strong relationships with our clients across the Bay of Plenty.

The role would suit someone at graduate level or with up to 3 years' experience. Your experience would ideally be in a consulting environment and preferably include at least 6 months' field experience.

About us

PDP is a New Zealand, employee owned environmental consultancy with over 140 staff nationwide. We provide engineering, scientific and planning services to a wide range of clients. With over 30 years' experience, we have a highly reputable and well-established brand.

The role

You will work with the contaminated sites/geotechnical/groundwater teams on a wide variety of projects, with a focus on contaminated sites and environmental geology / engineering geology. Duties include:

- Supervising drilling and test pitting investigations
- Undertaking geological logging
- Designing and supervising the installation of monitoring wells
- Planning, coordinating, and undertaking field sampling and / or monitoring; and organising laboratory analyses.
- Evaluation of results against environmental guidelines
- Writing reports on technical work
- Co-ordinating subcontractors and liaising with regulators and client contacts
- Application of company policies in areas including health and safety, quality, administration and technical procedures

Other duties may include:

- Hydrogeological investigations and assessment including drilling, instrumentation, testing and groundwater flow regime analysis. Potential project areas include water supply, mining, quarrying and landfills
- Monitoring and assessment of irrigation and water supply scheme activities
- Surveys of general environmental compliance and waste minimisation

- Assessments for infiltration systems to dispose of stormwater and wastewater
- Undertaking asbestos surveys
- Landslide investigation and assessment

You

You will have a degree, preferably Honours or Masters Level in Geology, Engineering Geology or Engineering. Your training/experience will be in:

- Contaminated site investigation and assessment - experience with oil industry investigations is desirable
- Planning and undertaking engineering geological/environmental investigations including aerial photograph interpretation, supervision of drilling and test pitting, hand-augering and preparation of geological logs, organising lab testing and interpretation of results
- Hydrogeological drilling programmes, permeability testing and conceptual model development
- Asbestos experience would be useful
- Concise reporting

We Offer

- The opportunity to work on a wide range of projects in the environmental field, with plenty of time outside doing site work.
- A supportive team to help you develop your skills
- Internal and external training opportunities
- An active social club
- A great location in the Tauranga CBD
- A culture of work/life balance
- A strong commitment to health and safety on site and a focus on general health and wellness
- Competitive remuneration

Our Tauranga team really enjoy living in the sunny Bay of Plenty; surfing, fishing and enjoying the local beaches. Rotorua is only an hour away with world class mountain biking on offer. Tauranga is also well known for events highlighting food and wine, music (including an annual jazz festival), arts and culture, and sporting events.

To apply

Please email employment@pdp.co.nz and include your CV and a covering letter.
