

PAT TLE DELAMORE PARTNERS LTD

Senior Environmental Geologist / Scientist - Wellington

- Advance your career in a growing company
- Highly professional, great people to work alongside
- Modern offices in the CBD
- Work alongside a highly skilled team of contaminated land, hydrogeology, water and air quality, and environmental management professionals.

PDP is a New Zealand, employee owned environmental consultancy with 140 staff nationwide across five offices. We provide engineering, scientific and planning services.

We are looking for someone with five to eight years' experience to join our busy Contaminated Land Group. You will have the opportunity to work on a wide range of projects in the environmental field with a focus on contaminated sites and water resources.

The Role Includes

- Supervising of drilling and test pitting investigations
- Undertaking geological logging.
- Designing and supervising the installation of monitoring wells.
- Planning and coordinating field sampling and laboratory analyses.
- Evaluation of results against environmental guidelines.
- Writing reports on technical work.
- Management of projects by co-ordinating staff, subcontractors and liaising with regulators and client contacts
- Training and mentoring junior staff in technical matters and contributing to developing technical expertise within the company.
- Application of company policies in areas including health and safety, quality, administration and technical procedures.
- Preparing technical papers for presentation at conferences.

Other duties may include:

- Hydrogeological investigations and assessment including drilling, instrumentation, testing and groundwater flow regime analysis. Potential project areas include water supply, mining, quarrying and landfills
- Monitoring and assessment of irrigation and water supply scheme activities
- Surveys of general environmental compliance and waste minimisation
- Assessments for infiltration systems to dispose of stormwater and wastewater

You Will Have

- Degree, preferably at Honours or Masters level, in Geology or Environmental Science
- Between 5 to 8 years' experience in environmental science/geology in a consulting environment

- Contaminated site investigation and assessment - experience with oil industry investigations is desirable
- Planning and undertaking geological environmental investigations including aerial photograph interpretation, supervision of drilling and test pitting, hand-augering and preparation of geological logs, organising lab testing and interpretation of results
- Hydrogeological drilling programmes, permeability testing and conceptual model development
- Concise reporting
- Contaminated land investigations/fieldwork/analysis/reporting

We offer

- Work on a varied range of interesting projects
- Internal and external training opportunities
- An active social club
- A supportive team of people to work with
- A great location in the CBD
- A culture of work/life balance
- Competitive remuneration
