

PATTLE DELAMORE PARTNERS LTD

Service Leader – Contaminated Land

Auckland and Christchurch

PDP is a New Zealand, employee owned environmental consultancy with 140 staff nationwide. We provide engineering, scientific and planning services to a wide range of clients.

Due to growth in the contaminated land group, we have two new Service Leader roles available – one in Auckland and one in Christchurch.

The Role

In this role, you will provide a key interface for the company to our clients on a day-to-day basis. The Service Leader is expected to collaborate with other members of the PDP Contaminated Land Team and PDP as a whole.

- Management of projects by co-ordinating staff, subcontractors and liaising with regulators and client contacts.
- Technical reporting, establishment and control of project budgets and preparation of invoices. Conducting fieldwork, as required.
- Business development by sourcing ongoing work from existing clients (both locally and nationally), developing new clients and raising your personal and the company's profile by presentation of papers at conferences.
- Providing input at team meetings including analysis and review of company financial data, with assisting with setting budgets, forecasting trends and determining future work prospects.
- Training and mentoring junior staff in technical matters and contributing to developing technical expertise within the company.
- Application of company policies in health and safety, quality, administration and technical procedures.
- Technical input and solutions to a wide range of environmental projects including the following activities:
 - scoping, budgeting, supervision, management, assessment and completion of contaminated land projects
 - interpretation of contaminant chemistry within a range of environmental media
 - data analysis, conceptual model development and assessment of media testing results against guidelines
 - application and understanding of human health/environmental guidelines and standards (including regulatory rules)
 - preparation, peer review of technical reports, and providing feedback to staff
 - numerical modelling of contaminant fate and transport

- environmental site audits
- input into resource consent applications (including compilation and coordination of AEEs) and liaison with Regional and Territorial Authority staff (and other stakeholders)
- input into or preparation of submissions on regional and territorial authority planning documents
- experience in the assessment of risk from asbestos preferred

You

- Degree, preferably at Honours or masters level, in geology, environmental science or engineering
- At least 10 years' experience in environmental science/engineering, preferably in a consulting environment
- Good commercial understanding of clients and their businesses
- Ability to lead and develop others

We offer

- Work on a varied range of interesting projects
- Personal and professional development
- An active social club
- A supportive team of people to work with
- A great location and modern offices, with 5 minutes' walk to trains, buses, carparks and a large mall.
- A culture of work/life balance and flexibility
- Competitive remuneration
- An opportunity to become a shareholder in the future

To apply

Please email employment@pdp.co.nz and include your CV and a covering letter.
