

PATTLE DELAMORE PARTNERS LTD

Service Leader/Senior Environmental Engineer – Three Waters

Christchurch

- A great opportunity to be a senior member in our environmental engineering team
- A highly reputable, growing company with a well-established brand
- An enthusiastic, supportive team and fun culture

PDP is a New Zealand, employee owned, environmental consultancy with over 160 staff, providing engineering, scientific and planning services to a wide range of clients.

We are looking for someone with 0 to 2 years' experience in hydrogeology to be part of our local and national Groundwater Group. The Group provides services for both its own external clients as well as providing specialist input to projects across all PDP Workgroups.

The Opportunity

You will work across a wide variety of projects and will be given the opportunity to further develop your skills and management expertise.

Your role would include:

- Management of projects by co-ordinating the project team and liaising with regulators and client contacts
- Design of stormwater control measures for subdivisions and industrial estates (both developed and undeveloped)
- Design of sewage/wastewater treatment and disposal systems for local authority and industrial clients
- Civil works design
- Supervision of investigations and construction of works
- Management of construction contracts including tender preparation, contractor evaluation, budget management, invoice reconciliation and works certification
- Supporting the development and performance of team members
- Supporting business development activities and profile-raising activities including conference presentations and technical publications
- Taking a proactive approach to client relationship management and ongoing liaison with regulators and other relevant bodies
- Ensuring quality, safety and risk management processes are developed and implemented
- Ensuring profitability of the team through effective and timely management of workflows and billing

About You

We expect you to have several years' experience in a consultancy in one or more specialist areas including in Three Waters engineering including but not limited to reticulation, treatment, disposal and modelling. You will also most likely have:

- A knowledge of 1D and 2D flood modelling software
- Specialised GIS skills with an ability to develop customised applications for environmental monitoring and investigation purposes.
- A working knowledge of local authority guidelines, Resource Management Act and other relevant legislation and standards/codes
- The experience/ability to manage and develop staff
- The ability to understand the market, build excellence, create a vision and develop the business
- Good communication and interpersonal skills
- Project negotiation and client liaison/management skills
- Self starter with a professional approach, able to work to deadlines and achieve results
- Proposal and report writing, presentation skills and preparation of technical papers

We Offer

- The support and responsibility you need to develop your skills and experience through the involvement in a range of interesting projects, alongside high calibre people
- Encouragement and financial support to attend courses and conferences to further your career
- The opportunity to become a shareholder in the company in the future
- Work flexibility if required
- A modern office in a premier location
- An active social environment
- Competitive remuneration
- A friendly supportive culture that encourages work/life balance.

To apply, please email employment@pdp.co.nz and include the following:

- ∴ Your CV
- ∴ A covering letter
