

PATTLE DELAMORE PARTNERS LTD

## Stormwater Services Leader- Auckland

- A key leadership role with the opportunity for further advancement
- A highly reputable and well-established brand
- A high achievement, enthusiastic and supportive culture

PDP is a New Zealand, employee owned, environmental consultancy with 180 staff, providing engineering, scientific and planning services to a wide range of clients.

The primary focus of this role is to lead our stormwater design and delivery team, working on stormwater and surface water resources projects. We are open to which of our offices will be the base, but prefer Auckland if possible. In any case, there will be travel around New Zealand.

### The Role

- Help build our stormwater services to a preeminent position in the NZ consulting market where we lead in the development of policy, procedures and innovative design solutions.
- Effectively performing, leading, managing and promoting the development of stormwater, trade waste and three waters consultancy services;
- Obtaining and leading stormwater design projects for the company;
- Working with water and surface water engineering design teams to produce detailed engineering designs;
- Interfacing with science, ecology and hydrology/hydrogeology teams;
- Leading business development activities and raising company profile in the stormwater sector. This may be through industry groups and/or special interest groups;
- Taking a proactive approach to client relationship management and ongoing liaison with regulators and other relevant bodies;
- Ensuring quality, safety and risk management processes are developed and implemented;
- Ensuring profitability of the team through effective and timely management of workflows and billing, and
- Where able, support and forward projects to other teams in the company

### About You

You will have 8 years plus experience in a consulting environment with substantive stormwater engineering experience, including in feasibility, design, modelling, and contract and construction management. Your experience will include:

- Client management and work stream development;
- Leadership and development of a team;
- Proposal and report writing, presentation skills and preparation of technical papers-
- Stormwater treatment analysis and design and modelling;

### **What we offer**
